

What makes Eqiva Lock so special

Your benefits

- Door lock with Bluetooth Smart technology for comfortable locking, unlocking and opening of doors via app
- Free smartphone app for iOS (8.3 and higher) and Android (4.4 and higher)
- Individual week profiles provide optimised access control
- The door can be locked automatically in the evening.

Easy to use

- Up to eight door locks can be operated via app
- Up to eight smartphones can be connected to one door lock
- The conventional key can still be used to open the door from the outside
- Patented gearbox enables manual operation via buttons, for example in case of panic or emergency situations

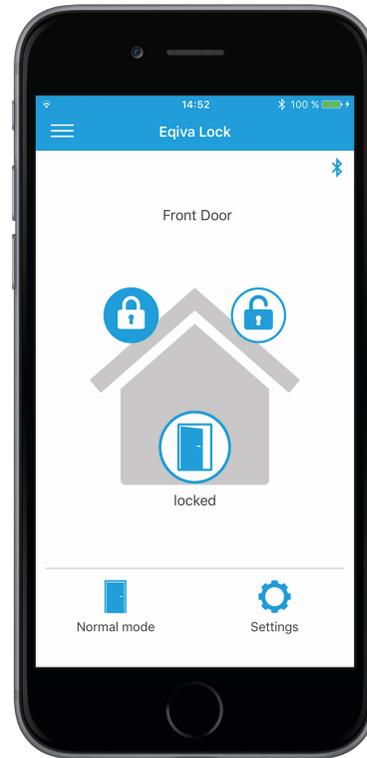

Secure communication

- Easy and anti-eavesdropping start-up between smartphone and supplied key card
- Highest security thanks to encrypted wireless communication and data authentication in addition to the Bluetooth security

Note:

To enable operation, the lock cylinder must jut out by 8-15 mm on the inside of the door, and it is essential to be able to unlock the door from the outside whilst a key is fully inserted from the inside.

Bluetooth Smart Lock

Easy to install

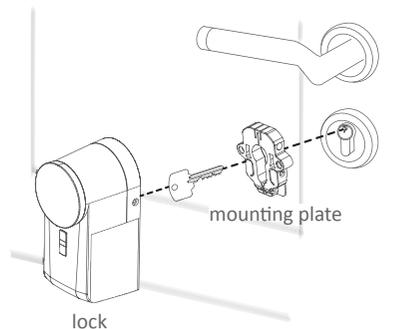

The battery-operated door lock can be used on all doors with standard cylinder locks and is suitable for owners and tenants.

The device is installed without any wiring on the inside of the door and is not visible from the outside. Your door and frames will not be damaged.

Installation can be done in two simple steps:

- 1) Download the free “Eqiva Lock” app from the Google Play Store (Android) or app store (iOS)
- 2) Follow the instructions in the app to connect the door lock with your smartphone

Your Eqiva Bluetooth Smart Lock is now ready for use.

Add security and comfort to your home

Automatic locking in the evening

Define a time for locking the door automatically and you will no longer have to get up late and check if the door is really locked. There is an increased feeling of security as your home will never again be unlocked at night.

Define individual week profiles for your family members and visitors

Every user receives their own profile that allows access during specified time periods. For example, your family is authorised at any time, but the housekeeper only has access to your house on certain days, at certain times.

No need for keys

The door lock detects authorised smartphones and locks or unlocks the door at the push of a button via the app. If you go running you need to carry only your smartphone – an additional key is not required any longer.
